

Public Safety Radio Building Amplification System Commitment to Design

This is to acknowledge that a Radio Building Amplification System will be installed or may be required for this building and applicable to the project noted below.

1 Project Information

Project address

City

Postal code

Building permit no.

2 System Details

Please check all boxes in either Section A (if a system will be installed) or Section B (system may be required):

A Check both boxes if a system will be installed

- The Radio Building Amplification System has been designed in accordance with the Public Safety Radio Building Amplification System Bylaw 2017, No. 5319.
- Prior to requesting a Final Inspection, a Radio Building Amplification System will be installed in the building after providing signed and sealed drawings for the system in compliance with the Radio Building Amplification System Bylaw 2017, No. 5319, if required.

B Check both boxes if a system may be required

- I certify that the building permit drawings currently submitted do not show design details for the Radio Building Amplification System, but that such a system may be required to be provided before the building can receive an accepted Final Inspection.
- The building is designed to and provided with infrastructure that will easily accommodate future installation of a Radio Building Amplification System in accordance with the Township Radio Building Amplification System Bylaw 2017, No. 5319.
