

OCTOBER 26 2022 BUILDER FORUM SERIES: WHAT WE HEARD FROM YOU

Topic: Integrated Design Process (IDP) for Part 9 Buildings
Attendance: 215 attendees
Survey respondents: 62
Presenters: Larry Clay (Clay Construction), Nicholas Bell (Qualico Development)

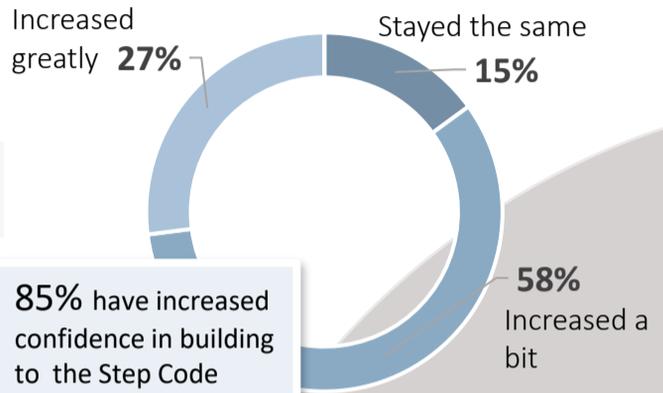

Level of satisfaction with webinar:

“Both the speakers were good and brought real life experiences with them”

“It helps having real life case studies using technologies we are familiar with”

Has the webinar increased your confidence in building to the Upper Steps of the Step Code?

85% have increased confidence in building to the Step Code

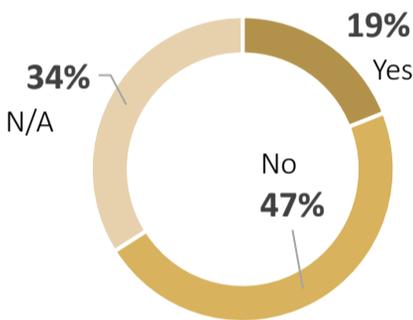

58% Increased a bit

“I will consider eliminating spray foam in certain areas”

“Very satisfied with the presentation. Possible improvement might be additional links to literature”

“Remember to insist on IDP at the start of the project”

Do you see any barriers in implementing IDP for your projects?

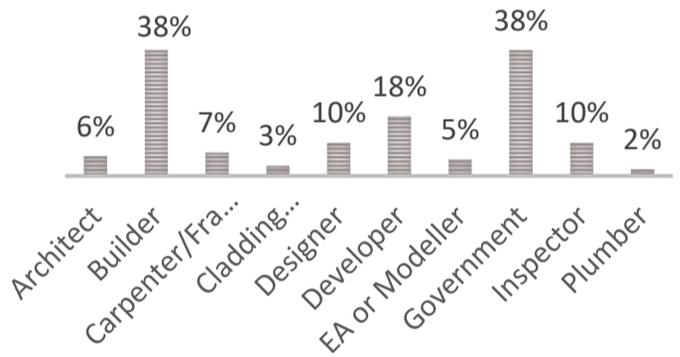

“I like seeing what other municipalities are doing”

“I value hearing about common pitfalls builders have experienced, and providing solutions to prevent them in the future”

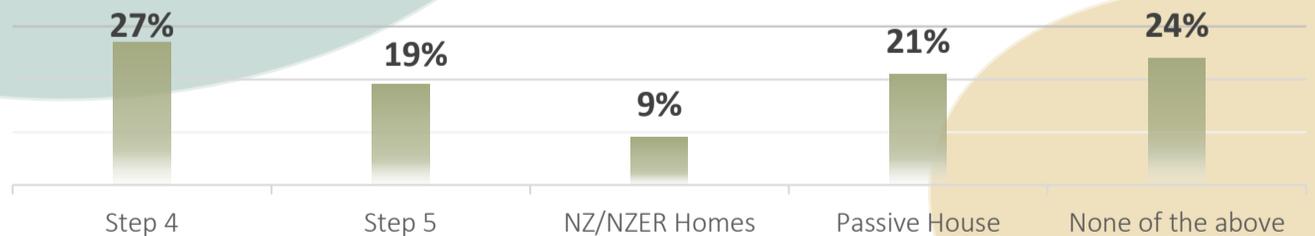

“The question and answer period at the end of the session was most valuable”

“More seminars like this that would be great. As a designing company it's really important for us to design the houses to comply with energy guidelines in the first place rather changing the design later. This is the platform we can ask questions if we are having these types of webinars. Really excited!”

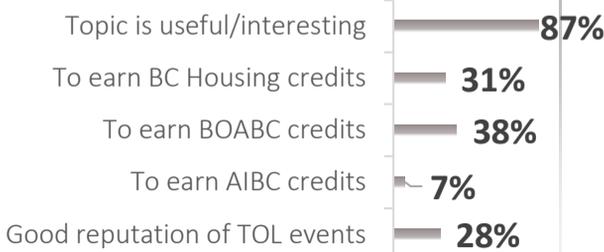

Attendees were a part of many different industries:

Which green building standards do you have experience constructing Part 9 buildings to?

Why did you attend this event?

Constructive feedback:

“Would like more discussion on gas vs. electric, GHG limits, and embodied carbon in buildings”

“More information on cost would be helpful”
