### **Schedules and Notes**

3. Schedules "A", "B" and "C" are attached hereto and form a part of this Bylaw.
4. The notes found at the bottom of Schedules "A", "B" and "C" form a part of this Bylaw.

### **Development Cost Charges**

5. In accordance with Section 559(1) of the *Local Government Act*, every person who obtains:
  - a. approval of a subdivision, or
  - b. a building permit authorizing the construction, alteration or extension of a building or a structure, other than a permit authorizing the construction, alteration or extension of a building or structure or part of a building or structure where:

the value of the work authorized by the permit does not exceed \$50,000;

must pay to the Township of Langley the applicable Development Cost Charges set out in Schedules "A", "B", and "C" of this Bylaw.
  - c. For certainty, this bylaw imposes charges in respect of a building permit or structure that will, after the construction, contain fewer than four dwelling units and for which the dwelling unit in the building or structure will be put to no other than residential use.
6. For a type of development not identified under Schedules "A", "B", or "C" of this Bylaw, the imposition of a Development Cost Charge will be at the sole discretion of the General Manager of Engineering for the Township of Langley, or their designate, with the amount payable based on the most comparable type of development, as determined by the General Manager of Engineering for the Township of Langley, or his or her designate, acting reasonably.
7. Subject to the *Development Cost Charge (Instalments) Regulation*, B.C. Reg. 166/84, as amended or replaced from time to time, Development Cost Charges imposed pursuant to

this Bylaw must be paid at the time of the approval of the subdivision or the issue of the building permit.

8. A development cost charge is not payable if the development does not impose new capital cost burdens on the Township of Langley. A new capital cost burden will be imposed where there is a new demand created for designated services. A determination of whether a development imposes a new capital cost burden on the Township of Langley will be in the sole discretion of the Director of Engineering for the Township of Langley. A determination of whether a new demand for services is created on a subdivision will be based on, among other things, the number of pre-existing fee simple lots (but excluding pre-existing stratified lots) prior to the subdivision. For greater certainty, and without limiting in any way what else may constitute a new capital cost burden, the creation of new fee simple lots will be deemed to have imposed a new capital cost burden on the Township of Langley for which development cost charges may be imposed.
9. For Development Cost Charges imposed pursuant to this Bylaw on single family residential subdivisions, a credit will be granted for each existing fee simple lot, but excluding an existing stratified lot, forming part of the subdivision at the time of the subdivision, or building permit application. For multiple family residential developments, a credit will be granted for each existing dwelling unit forming part of the development at time of the subdivision or building permit application. For non-residential developments, Development Cost Charges are assessed based on the additional Gross Floor Area or additional Area of Development, as applicable.
10. Where a developer is required to provide, or pay to provide, a specific service or part of a service, pursuant to a Development Works Agreement under section 570 of the *Local Government Act*, and the cost of the service is included in the calculations used to determine the amount of Development Cost Charges imposed pursuant to this Bylaw, then the cost of providing the service shall be deducted from the class of Development Cost Charges applicable to the subdivision or development for the particular service, as set out in the schedules hereto, the amount of which shall be calculated as the cost of the work less the amount to be paid by the Township of Langley to the developer under the Development Works Agreement, other than any amount paid as interest.
11. Where a developer is required to provide, or pay to provide, a specific service or part of a service, outside the boundaries of land being subdivided or developed, not pursuant to a Development Works Agreement under section 570 of the *Local Government Act*, and the cost of the service is included in the calculations used to determine the amount of Development Cost Charges imposed pursuant to this Bylaw, then the cost of providing the service shall be deducted from the class of Development Cost Charges applicable to the subdivision or development for the service, as set out in the schedules hereto, the amount of which shall not exceed the lower of the following amounts:
  - a) the amount of Development Cost Charges identified as "DCC Recoverable" in the DCC review report prepared as part of the Township of Langley's DCC program, as amended, or replaced;
  - b) the amount of Development Cost Charges calculated for the subdivision or building project pursuant to the provisions of this Bylaw for the class of service; or

- c) the estimated amount for providing the service, as determined by the developer's qualified professional, acting reasonably.

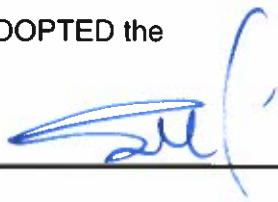

**Expenditures from DCC Reserves to Developers**

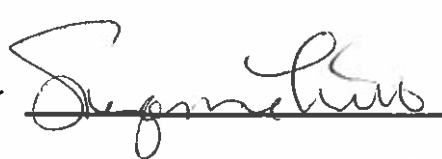

12. Where the Township of Langley has entered into an agreement with a developer to complete works, including a Development Works Agreement under section 570 of the *Local Government Act*, and those works are included in the calculations used to determine the amount of Development Cost Charges imposed pursuant to this Bylaw, the Township of Langley may expend monies from the applicable Development Cost Charge reserve to repay the developer some or all of the capital costs the developer incurred in completing a project.
